

HAMILTON®

The Toughest on the Planet

Warehouse & Distribution

Using the right material handling equipment is important when considering how to work within a warehouse or distribution center. The safety of employees, in addition to the durability and resistant of your equipment must be a consideration.

Material handling investments result in improved efficiency.

Caster-steer trailers, like the one below are very beneficial as part of the breakpack process in distribution centers. They are extremely easy to maneuver and track well behind tuggers. When this type of trailer is introduced, associates find it much easier to unload products, resulting in improved efficiency throughout the entire order fulfillment process.

Carts & Trailers

Load Ratings up to 4,000 lbs.

Maximizing capacity and maneuverability this cart can be pushed as individual carts or coupled together to create a train. Running on Champion Casters with 10" Duralast® wheels makes them easy to push around a warehouse underload.

**Need higher capacity?
We can customize a cart to fit your needs.**

XT3156 - Capacity: 4,000 lbs.

Workhorse (WH)
Load Rating (ea.):
300 - 2000 lbs.

Champion (CH)
Load Rating (ea.):
1600 - 4000 lbs.

Casters & Wheels

Load Ratings up to 4,000 lbs.

When it comes to warehouse and distribution centers look no further than the Champion and Workhorse Series casters. Designed to match popular industry mounting plates and built to last. These Duralast® wheels wear like steel and offer a soft ride. Add them to your existing equipment for a new and improved ride.

Custom Carts and Trailers

Load Ratings: Up to 100,000 lbs.

Hamilton handles the pressure in material handling's heaviest, grittiest and most complex jobs.

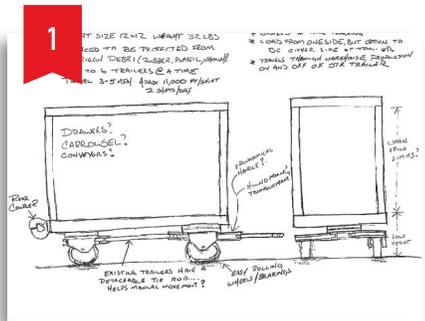

...including custom massive trailers that haul up to 50 tons of wing, fuselage and rudder for major aerospace manufacturers, and platform trucks that help a leading package delivery & logistics corporation ship millions of packages. Our custom carts and trailers ride on our legendary industrial casters and are backed by an industry leading three-year warranty.

- Industries & Applications**

The Birth of a Factory Floor Workhorse

Conceptual Drawing

Every custom job starts with an empty canvas and collaboration with our engineers.

3D Rendering

Once everything adds up on paper, it's time to test it to spec with a CAD rendering.

Finished Product

What began on a sketchpad has morphed into a 2,000-pound-toting steel workhorse.
